1.12 INTERNATIONAL SHIP AND PORT FACILITY SECURITY CODE (ISPS CODE)

The International Ship and Port Facility Security Code (ISPS Code) is a code agreed between members of the signatures to the International Convention for the Safety of Life at Sea (SOLAS) on minimum security arrangements for ships, ports and Coast Guard agencies. The Code was introduced by the International Maritime Organization (IMO), the overseer of the original SOLAS agreement, in the wake of fears of terrorist attacks on ships and ports after the September 11 terrorist attacks. The code was agreed at a meeting of the 108 signators to the original convention in London in December 2002. The measures agreed under the code were brought into force on July 1, 2004. The code does not specify specific measures that each port and ship must take to ensure the safety of the facility against terrorism because of the many different types and sizes of these facilities. Instead it outlines "a standardized, consistent framework for evaluating risk, enabling governments to offset changes in threat with changes in vulnerability for ships and port facilities."
